

IN THE ABSTRACT:

Please replace page 23 of the specification with the enclosed new page 23 containing a revised Abstract.

IN THE SPECIFICATION:

Please replace the Specification, as filed in the application, with the enclosed Substitute Specification which Applicant respectfully submits does not add new matter but which corrects typographical and/or grammatical errors in the original Specification and particularly addresses the basis for non-compliance by the originally filed Amendment. In accordance with the provisions of MPEP §608.01(q), a marked-up copy of the originally filed Specification is enclosed showing all of the changes made in the original Specification to produce the Substitute Specification. Applicant is submitting the Substitute Specification in lieu of amending the Specification in this Amendment. Thus, Applicant respectfully requests that the Examiner accept the Substitute Specification for entry in the application in order to facilitate processing of the application.
